

How is Highway 84 expansion creating Union City and Fremont cut-through traffic?

84 Expressway Widening and State Route 84/I-680 Interchange Improvement Project is part of widening SR-84 to a four-lane expressway, improving the I-680/84 Interchange, and extending the beginning of the southbound I-680 High Occupancy Vehicle/express lane northward by about two miles. The project will increase congestion and worsen traffic circulation to the west using the proposed 4-lane expressway Quarry Lakes Parkway and 2-lane Niles Canyon SR-84 (bottom left).
